

PROGRAMMES ELIGIBLE FOR CLINICAL TRAINING FUNDING

Eligibility criteria

- 1 The basic criteria which any health sciences programme must satisfy to qualify for a clinical training grant are listed below:
 - 1.1 The University must carry full academic and administrative responsibility for the programme. Any health sciences programme which is offered in partnership with a college or other external institution is not eligible for funding.
 - 1.2 The curriculum of the programme must include clinical training which requires students to have access to the facilities, patients and clinical staff of provincial health services.
 - 1.3 Except for the exceptions listed in 1.4 below, the programme must be at undergraduate level and must offer initial training in a health sciences discipline.
 - 1.4 The only exceptions to criterion 1.3 are masters-level programmes which offer specialist training in medicine, surgery and dentistry. No other post-initial training programmes qualify for clinical training grants.

Programmes qualifying for clinical training grants in 2014/15 and 2015/16

- 2 The following health sciences programmes have been approved for clinical grant funding in 2014/15 and 2015/16:
